Easy-to-Use interface

Low maintenance

**Works with ADR
Autoloaders**

**Leading manufacturer in
CD/DVD market**

Signature Z6™ Automatic CD/DVD Duplicator

Whether you duplicate discs for audio, music, software, video or data, Signature Z6 delivers all the performance you need for high-volume, high-quality disc printing - at a price that is surprisingly affordable. When reliability, speed and the highest-quality photo-realistic output are required, Signature Z6 is your best CD/DVD printing solution in the inkjet field!

With 4800 dpi print resolution and six-color printing, all of your discs will have the sharpest text, graphics and photos.

Printing

Print With Six-Colors Instead of Four. By adding light cyan and light magenta to CMYK, you get absolutely stunning results. Faces look more natural. Shades and gradations are more gradual and smooth. Colors are brighter and even more vibrant.

Advanced Inks and Software

Signature Z6 uses a special ink formulation that dries faster and is more permanent on printable-surface discs than other direct-to-disc printers. It also includes our PrimaColor™ and new Z-Color™ Color Matching Systems for the most accurate and precise control over the colors you create and print. There's even our exclusive, patent-pending ink level warning system that knows precisely how much ink remains based upon the actual graphic images and layout you've designed.

Flexibility

For fully automated disc production, be sure to check out the ADR CD/DVD Duplicator Series like the Hurricane or Cyclone. Signature Z6 interfaces perfectly to this high-capacity, automated disc duplication system.
